

## STEAM Robotics

We provide professional development for educators and programs for students K- 12! We utilize the BirdBrain TECHNOLOGIES method, emerging from the *Carnegie Mellon Robotics Institute*. Our robot programs support engineering, computer science and project-based learning.

.....

## STEAM Arts in Motion

Unique “device free” program, invoking the **A** in STEAM! This course is a unique fusion of **ART**, Imagination & Mindfulness.

We combine crafts, music, writing, movement and imaging techniques. The program designs virtual sanctuaries with the intention to grow our ability to find creative solutions for school, work and home. For educators, students, & business communities.
